

New Evidence Lab & Storage - Only 20 minutes from downtown Philadelphia.

BLACKWOOD, NJ: NEFCO's new state-of-the-art laboratory & evidence storage facility opens January 5th, 2015. Our newest location consists of a 700 square foot lab and several thousand square feet of secure warehouse space to store evidence from your loss scene. Additional features include a private conference room for consultations with clients, experts and counsel. To help you keep up with your busy claim/case workload, semi-private cubicle work stations with WIFI access are also available for your convenience. Our new facility has air conditioning and heating. The spacious lab area accommodates groups of 10 or more. Large items can be easily inspected in the laboratory and are carefully maneuvered to and from storage with an on-site 5000lb forklift truck, various size dollies and hand trucks. Viewings can be videotaped by the evidence technician at your request.

A portable Golden XRS-3 X-ray source allows for valuable detailed examinations and the Logos Digital Imaging System converts the X-rays into digital images, providing instantaneous results. The Scienscope is a 10x/60x power, trinocular-body SSZ stereo microscope with various optional optic lenses and includes a 2 megapixel HDMI 1080P camera that is connected to a desktop computer (Windows 7) and viewed for close-up clarity on our 40" monitor, as well as with our imaging software we can capture still pictures or record video. Electrical testing equipment includes: a Megger insulation tester, open/closed circuit tracers with inductive clamps, several Fluke multimeters, as well as a Raytech digital handheld temperature gun and a Rigid Seesnake Inspection Camera with 6' reach and 12'view.

Other items include an assortment of pneumatic tools, bearing pullers, wrenches, sockets (metric and standard), Dremels, heat guns, various other hand tools and compressed air for use with pressure testing and/or pneumatic tools. We also have a variety of safety equipment for use during views and testing including Tyvek suits and shoe covers, safety goggles and glasses, hearing protection, and powder-free latex gloves.

35min from Wilmington DE – 30min from Bala Cynwyd – 50min from Blue Bell – 25min from Mt. Laurel – 40min from Trenton – 55min from Harleysville area
